

Bottle shaped gas nozzles for gas-cooled gun necks

OVERVIEW

For optimized accessibility screw-on type connection to the neck. Massive design for long life and heat transfer purposes. Good insulation properties separating the front end of the gas nozzle from cable connection - against heat and electricity.

Three main lengths to choose from (TCP remains the same)

-2 mm, best gas flow, gas nozzle most sensitive against spatter

0 mm, recommended as a default

+3 mm, best accessibility, gas nozzle less sensitive against spatter generation, gas shield reduced
